Mountain Weather Forecast

Brecon Beacons National Park

Forecast valid from 06:00 on Saturday 24 Jun 2023 until 23:59 on Sunday 25 Jun 2023

Forecast Issued on Saturday 24 Jun 2023 at 03:48

Confidence: High confidence for very warm and humid conditions this weekend, giving way to a fresher westerly airstream for next week. Some uncertainty regarding how active a cold front will be on Sunday, which initiates the change to cooler weather.

Headline for Saturday 24 Jun 2023: A cloudy start with areas of hill fog. Becoming sunny later this afternoon.

Mountain weather hazards on Saturday 24 Jun 2023

Blizzards No Likelihood	**Heavy persistent snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** Low Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** Medium Likelihood

Forecast for Saturday 24 Jun 2023

Weather: A cloudy start with mist and areas of hill fog, especially on hills above around 400 metres. A small chance of the odd spot of light rain or drizzle too. Cloud slowly lifting this morning to give some sunny intervals this early afternoon, and then becoming increasingly sunny late afternoon and this evening.

Chance of cloud-free hill tops above 600m: Around 20 or 30% at first, increasing to 100% late morning and remaining at 100% thereafter.

Low cloud and visibility: Cloud this morning will have bases down to around 400m, giving poor visibility on the hill tops. Cloud gradually lifting and breaking, with any cloud this afternoon above the summits. Visibility becoming good or very good this afternoon and evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Early hill fog will make hill walking difficult near the summits, due to the impaired visibility. This afternoon sunshine UV levels will be high so adequate sun protection may be required.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Sunday 25 Jun 2023

Weather: A warm and sunny start. Showers developing from the west from mid to late morning, with further showers breaking out through the afternoon, which could become heavy and thundery. Feeling very humid. Showers should die out during the early evening to leave a dry end to the day with clear spells.

Maximum wind: Southeast 15 to 20 mph, gusts 25 to 30 mph, becoming west to southwest for the afternoon and evening and increasing with showers to around 25 mph with gusts 35 to 40 mph. West winds then easing later evening.

Chance of cloud-free hill tops 600m: 80% or more at first, decreasing to around 30% in showers, then increasing 80% or more again into the evening.

Low cloud and visibility: Cloud may lower onto hills above about 400 or 500 metres temporarily during heavy showers or thunderstorms. Visibility very good, but decreasing to moderate or poor during some of the showers.

Temperature: **Valleys:** PS17C increasing to PS25C
At 600m: PS15C increasing to PS20C
Freezing level: Above the summits throughout.
